Projects

IBM Nittany Watson Challenge

<http://edtechnetwork.psu.edu/watson>

January 2017 – present

Currently in development. We are currently developing a web application (Python on Django), to facilitate students concerns and general communication with administration at Penn State, focusing on natural language analysis algorithms with the help of IBM Watson analytics.

groupcaster

<https://groupcaster.herokuapp.com>

January 2017 – present

Currently in development. This web application, created with Ruby on Rails, is a reimagining of early social media sites. Mostly created for me to practice web app development and the MVC design pattern. Current features include secure registration/login, password hashing, user profile styling, user message posting and user follow functionality.

(Try out the site using login: *guest@groupcaster.com*, password: *password*).

Work Experience

Computer Aid, Inc.

Harrisburg, PA

Software Development Intern, May 2016 – October 2016

Tech/Frameworks: Microsoft Visual Studio, ASP.NET, Web Forms, MVC
Languages: C#, Javascript, VB.NET
Projects: Worked on a team building a web app for healthcare inspections.
Completed projects and demos in MVC along with Web Forms

Beechtree Landscape & Design

Baltimore, MD

Office Manager, Jan 2013 – Jan 2014

Managed office and handled company finances.
Created advertising campaigns and artwork for marketing purposes.
Acted as a resource for employees with assistance in legal and financial issues.
